PROJECTS

2024 DEC – 2025 FEB

FOOD ORDERING WEB APP

[Live](#) | [Github\(frontend\)](#) | [Github\(backend\)](#)

This platform connects customer and restaurant owners for a seamless delivery experience. Customers can browse restaurants, place orders, make secure payments via Stripe, track orders in real-time and manage their profiles. A cancellation policy offers full refunds within 5 minutes and partial refunds afterwards. Restaurant owners benefit from a management dashboard with real-time order notifications, menu updates and order tracking.

2023 DEC – 2024 FEB

SOLAR ECOMMERCE PROJECT

[Live](#) | [Github\(frontend\)](#) | [Github\(backend\)](#)

In this project, users can come and sign up for their account, add the products to the favourite cart or shopping cart and make the purchase via Stripe. Users can also view their orders in the Order tab. In the case where users forget their password, an email will be sent to their email address and user will be able to reset the password by clicking on the link provided in the email. Users are able to update their personal information(name, email, profile picture, password) in the Account & Settings tab as well. If the users have any questions, they can send an email to the admins via Contact Us form. Once a purchase is made, an email with purchased order details is sent to the user email and a message is sent to the admin only telegram channel group. Admins can join admin only telegram channel [here](#).

2024 October

WEBMAG

[Live](#) | [GitHub](#)

WEBMAG is a blog site to share programming related blogs from admin using admin panel and visitor and come and checkout blogs.

2024 November

Solar Ticketr

[Live](#) | [GitHub](#)

Solar Ticketr is a place where vendors can sell tickets for their events. Vendors can set up their own stripe account and get paid directly for a ticket purchase. Solar Ticketr, as a platform, takes a small percentage cut of every ticket sale.

2024 JAN
